1. The applicants are informed that a typographical error exists in the original U.S. Patent 5,745,182. Specifically, Patent No. "4,864,294" as identified for the Gillard reference on the front page of U.S. Patent 5,745,182 should be Patent No. "4,864,394" instead. The Examiner has indicated the correction to be made as shown in the attachment. No further action is required by the applicants.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Lee whose telephone number is (571) 272-7333. The Examiner can normally be reached on Monday to Friday from 8:00 a.m. to 5:30 p.m, with alternate Fridays off.

Primary Examiner—Richard Lee**Attorney, Agent, or Firm**—Watson Cole Stevens Davis, P.L.L.C.[57] **ABSTRACT**

A method for predicting motion compensation for determining of an input image based on a motion vector of the input image from this input image to a reference image which has been sampled at a first set time, and the method includes calculating a motion vector of the input image based on a move, at a second set time, of a block unit which is a part of the input image and consists of a plurality of pixels, and calculating a motion vector of the reference image based on a move, at the first set time, of a block unit which is a part of the reference image and consists of a plurality of pixels. Move compensation of the input image is calculated both from the motion vector of the input image and from the motion vector of the reference image, to thereby realize a method for determining motion compensation with high precision.
